

# Chemsorb® 1202

**molecular**

High-grade impregnated activated carbon for removal of acid gases.

## Description

Chemsorb® 1202 is specifically designed as a high-grade impregnated activated carbon for use in critical filtration applications such as breathing air respirators. The proprietary reagents used to impregnate this high activity coconut shell carbon have shown superior results for the adsorption of airborne acid gases. Chemsorb® 1202 is virtually dust-free, ammonia-free, and contains no heavy metals such as copper, lead, mercury, nickel or chromium.
